

SOLID WASTE AND RECYCLED MATERIALS APPROVED HAULER LIST (As of 11/18/2013)

Solid Waste

All Service Refuse Company, Inc. is the only approved hauler of solid waste in the City of Sunrise. No other company may solicit or accept solid waste collection or disposal business in Sunrise.

Construction & Demolition (C & D) Materials

The Sunrise City Commission on September 23, 2003, voted to eliminate the City's recyclable construction and demolition debris franchise program effective October 1, 2003. As of that date all construction and demolition debris is considered solid waste and subject to collection, transportation and disposal solely by the City's exclusive solid waste franchise hauler, All Service Refuse.

Commercial Recovered Materials Recycling

Commercial recovered materials recycling is available to businesses in Sunrise that produce a mix of solid waste and recyclable waste. These items must be separated and disposed of in separate containers (dumpsters). It is the responsibility of both the business owner and the hauler to ensure that solid waste materials are not included with recyclable materials. While the solid waste must be hauled exclusively by All Service Refuse Company, Inc., the business may contract with another registered hauler for removal of recovered materials.

The following companies are registered in Sunrise as haulers of recovered materials for the period October 1, 2013 through September 30, 2014:

- Ace Waste Service, LLC
- All American Recycling Center, LLC
- All Florida Scrap Metals, Inc.
- Eastern Waste Systems, Inc.
- Farris Waste Services
- Miami Waste Paper Co., Inc.
- Panzarella Waste & Recycling Services
- Progressive Waste Solutions of Florida, Inc. (Choice Environmental/ Waste Services)
- Republic Services of Florida, D/b/a., All Service Refuse
- Sun Recycling, LLC
- Waste Management Inc. of Florida., D/b/a., Southern Sanitation Services
- Waste Pro Florida, Inc.

List of approved haulers for solid waste and commercial recycling may change without notice. Please contact City of Sunrise Finance Department at (954) 577-1135 for current information.

Note: Section 16-125 of the Sunrise City Code provides requirements for the storage of sanitation equipment, materials and supplies within screened enclosures.

Sunrise Code – Section 16-125

Sec. 16-125. Open storage, garbage and refuse.

- (a) The storage of all equipment, materials and supplies shall be entirely within an enclosed building unless explicitly authorized to the contrary by this Code.
- (b) In RM-16, RM-25, PUD and PDD zoning districts, and in all nonresidential zoning districts, garbage or refuse shall be stored in containers and be stored only within an enclosed building or within an architectural enclosure sufficient in height and design to screen such containers from the public view, except as provided in subsection 16-125(c). Developments in RM-16, RM-25, PUD and PDD zoning districts and developments in nonresidential zoning districts shall have screened enclosures sufficient in size to screen a garbage or refuse container and a second container, which shall be used solely for the disposal of recyclable materials. Recyclable materials are those materials that are capable of being recycled and that would otherwise be processed or disposed of as solid waste. The container for recyclable materials shall be clearly marked to show its intended purpose.
- (c) Up to two (2) city-issued recycling containers may be stored to the side or rear of a residential unit located in an RM-16 or RM-25 zoning district where no enclosure exists, and where a certificate of occupancy was issued for the residential unit prior to July 1, 2011. Such individual recycle containers shall be screened by fences, walls or landscaping to the extent practical. No recycle container shall be stored in any location that is visible from any public right-of-way. Outdoor storage of garbage containers is prohibited.
