Mr. Goldstein summarized the Staff Report with the entire report entered into the record. Mr. Goldstein indicated the proposal is to demolish a portion of an existing shopping center in order to construct a 47,000 square foot grocery store as well as provide modifications to the rest of the center's existing façade and site.

Mr. Mike Troxell, Engineer of Thomas Engineering Group, and Ms. Sara Thompson, Attorney of Miskel Backman LLP, were present and provided a presentation about the application.

Ms. Antoine asked about the current tenants. Ms. Thompson replied the current tenants are aware of the proposed changes and the portion of the center to be demolished has been vacant for some time.

Ms. Antoine asked how long would it take to complete this project. Mr. Troxell replied that he anticipates the site plan approve and permitting process would take approximately 4 to 6 months and the construction phase would take approximately 12 to 18 months.

Mr. Iannacone indicated this project would be a positive change and is similar to a revised Publix plaza in the City of Weston.

Mr. TabEEK asked if the parking lot would only be resurfaced, as he is concerned with flooding and stagnant water issues. Mr. Troxell stated this revision includes repaving, new water and sewer lines, and overlays in the back and front of the property. Mr. Troxell also noted this property has been cited for potholes and permits have been applied for to patch those potholes. Mr. Goldstein added the patching is a temporary fix and these issues will be addressed during the Engineering permitting review.

Mr. Assidon stated he believes this is a beautiful concept and welcomes the project.

Mr. Milhomme requested further information on the parking. Ms. Thompson replied that the shopping center exceeds the required amount of parking spaces, per the City's code.

Ms. Lewis stated that this proposal only appears to be a façade change and not a revision to the site. Mr. Troxell explained some of the proposed changes for the shopping center's site including landscaping, curbing, overlay where the infrastructure will be replaced, and deeper sewer lines.

Ms. Lewis asked if the footprint of the existing space would be changed. Mr. Troxell replied that the footprint will be smaller once redeveloped.

Ms. Lewis asked if the directional orientation of parking spaces will change. Mr. Troxell stated the orientation will remain the same.

Ms. Lewis asked about access from University Drive and if it is a shared access point with Walmart. Mr. Troxell discussed the access and the access easement for Walmart.

Ms. Lewis asked if the subject vacant space will be used for a Publix. Ms. Thompson replied there is a prospective tenant which has not been finalized and cannot be confirmed at this time.

Mr. Milhomme asked about the impact construction will have to the adjacent tenants. Ms. Thompson replied the adjacent tenants are not centralized to the subject site, therefore, no impact is anticipated.

Mr. Assidon motioned to approve the application. Seconded by Mr. Iannacone. There was no further discussion.
